

Safety Candle Shells for your church

with the original
Heliotron Liquid Wax Candle

Heliotron Safety Candle Shell

Heliotron Liquid Wax Candle with Safety Deco Sleeve

The easy-to-use, versatile candle that never drips and won't burn down!

Our product advantages compared to conventional wax candles:

- ⊕ Longer burn-time
- ⊕ Very clean
- ⊕ Extinguishes when toppled over
- ⊕ Low cost per burn-hour
- ⊕ Soot- and odorless

Heliotron Liquid Wax Candles are available with a burn-time of up to 45 hours. Conventional candles will only last a few hours and constantly have to be replaced, leaving tenacious wax stains on sacral artifacts, candleholders or fabrics. Our Safety Candle Shell will not leave wax stains and looks brand-new even after hundreds of hours. These advantages make the candle shell perfectly suitable for use as **procession-, apostle-, or acolyte candle.**

Heliotron Safety Candle Shell

The system

Our Heliotron Safety Candle Shell is based on a modular system which combines cleanliness, safety, visual appearance and innovation in one candle.

Heliotron-Candle Shell

The durable candle shell material allows the flame to shine through, which increases the natural effect of the candlelight. Our candle shell is available in different lengths and diameters and can be custom-made to fit your exact requirements.

Liquid Wax Candle

The „heart“ of each candle shell is our original see-through Liquid Wax Candle. It is leak proof and not pressurized. The pure liquid wax burns absolutely soot- and odorless with a burn-time of up to 45 hours.

Safety Deco Sleeve

The safety deco sleeve slides into the candle shell along with the liquid wax candle. If the candle should topple over, the safety deco sleeve slightly slides up and extinguishes the flame!

Safety Candle Shell

Voilà, here is your perfect safety candle shell! From now on you won't have to bother for up to 45 hours. It won't burn down, won't drip and always looks brand new.
